Summary

Data Scientist applying machine learning to trading and financial problems. Currently enrolled in a joint Master's program at NES and Skoltech in "AI & FinTech". B.Sc. in Robotics & AI (ITMO). Proven ability to lead R&D teams and contribute to collaborative projects.

Work Experience

Data Scientist, Sberbank CIB *May 2026 – Present*

– Develop and implement RL agents for trading desk pricing and optimization.

Data Scientist, Yandex Lavka *Jan 2026 – May 2026*

– Optimized discount levels using price elasticity estimates, increasing Front Margin by 5%, as confirmed by a large-scale A/B test.

– Automated experiment setup and approval, reducing preparation time from several hours to a few minutes.

– Built infrastructure for collecting and analyzing experiment results, along with dashboards for price elasticity analysis.

– Automated product selection for experiments based on sales volume and popularity.

Research Engineer, ITMO University *Jul 2022 – Jun 2025*

– Applied ML, computer vision, and robotics at the Adaptive and Nonlinear Control Systems Lab.

– Rosneft: developed and deployed real-time SLAM for UAV infrastructure inspection; achieved 25 FPS on NVIDIA Jetson Xavier.

– Sber Robotics Center: implemented safe RL (SAC + safety layer) for manipulation, achieving 95% grasp success and tool calibration error below 1 mm.

– Developed quadruped odometry, ROS2 UAV control, RGB-D point-cloud processing, and 6D object pose estimation.

– Presented research on UAV crop analysis (YOLO and classical CV) and diffusion models for robotics at ITMO's Congress of Young Scientists.

Team Lead, BRIZ Project on Collaborative Aerial Robotics *Dec 2023 – Jul 2024*

– Led a team of three developers in a project on autonomous drone docking.

– Implemented low-level flight controllers (PX4+ROS2) and high-level motion planning.

– Coordinated project stages and ensured timely delivery.

Achievements

- Contributor to Ultralytics (authors of YOLO).
- Winner, StarLine Hackathon "Autonomous Future" (2023).
- Winner, St. Petersburg Open Winter Robotics Competition (2022).

Education

2025–2027 **NES** — Master of Science, AI & FinTech
2025–2027 **Skoltech** — Master of Science, Data Science
2021–2025 **ITMO University** — Bachelor of Science, Robotics & AI

Skills

Quantitative Finance & Risk	Portfolio optimization, asset pricing (CAPM, factor models), risk modeling, VaR/CVaR, duration & fixed income analytics
Econometrics & Causal Inference	Time series econometrics, panel data, DiD, A/B testing, uplift modeling, price elasticity estimation
Data & Analytics Tools	Python, SQL, Pandas, NumPy, SciPy, Jupyter, Git, Docker

Languages

English — Advanced (TOEFL 106/120); Russian — Native
